INMED
CORPORATION

We help you grow your business.

ISO 9001
2015 SERIES
CERTIFIED

The first ISO 9001 certified medical products trading company.

Who we are

Inmed Corporation is the country's leading and trusted master distributor of quality local and imported medical products and supplies. With the primary focus of providing solid marketing support, Inmed Corporation has established a dependable structure offering significant value to its resellers and dealers in the Philippines and neighboring Asia Pacific Countries.

Committed to help both local and multinational medical partner companies in the Philippines to achieve their target goals. Inmed Corporation continues to work hand-in-hand with them to extend and further expand market reach. The company utilizes its financial strength to purchase high volume supplies and offer its resellers savings at the best attainable cost.

Managed by a team of top professionals in the industry with combined experience of over 60 years in medical products, sales, marketing and distribution, Inmed Corporation boasts of seasoned round-table negotiations, financial packaging and the best business practices benchmarked on international standards providing economical and fundamentally sound solutions to your business needs.

Our Mission

Our mission is to provide quality local and imported medical products at competitive prices and offer professional customer-oriented service.

Our Vision

Our vision is to be the Philippines' leading master distributor of quality medical products – being the preferred supplier of all resellers in the industry and recognized as a strong partner in sustainable healthcare in the nation.

ISO Certified

INMED Corporation is ISO 9000:2015 certified by TUV, compliant with the International Organization for Standardization based in Geneva, Switzerland. It is our commitment to provide our customers with only high quality products, unparalleled service excellence, and reliable timely delivery of all customer orders. Customer satisfaction is our guarantee.

TABLE OF CONTENTS

MEDICAL EQUIPMENTS

EDAN®

ECG Machine 1-Channel

Edan Single Channel SE-1 is a compact single-channel ECG machine that record ECG waveforms in real-time, it displays clear traces with real-time heart rate and records real-time traces of user-selected leads.

FEATURES AND BENEFITS:

- ▸ Vivid waveform with foldable LCD display
- ▸ Built-in high resolution thermal printer
- ▸ Well-designed membrane keyboard
- ▸ Digital filters, resisting baseline drift, AC and EMG interference
- ▸ Automatic baseline adjustment
- ▸ Lead-off detection and alarm

REF CODE	DESCRIPTION / SIZE	UOM	QTY/BOX	QTY/CTN	MDR

EDAN®

ECG Machine 3-Channel

The Edan ECG Machine is a high-quality and reliable three-channel ECG unit that features a compact and lightweight design, portable for any work situation.

FEATURES AND BENEFITS:

- ▸ Ultra-compact and lightweight design
- ▸ High resolution color touch screen
- ▸ 12-lead simultaneous acquisition and display
- ▸ Support linear/2D barcode scanner
- ▸ Signal quality identification
- ▸ Long time sampling
- ▸ Built-in rechargeable Li-ion battery

EDAN®

ECG Machine 12-Channel

The Edan ECG Machine Express is designed to meet high-standard ECG requirements, designed with complete powerful data analysis functions, this unit offers reliable ECG solutions for both resting ECG and stress test.

FEATURES AND BENEFITS:

- ▸ Large high resolution colored touchscreen
- ▸ Comprehensive filters & anti-noise technology
- ▸ Real-time ECG waveforms freezing and review
- ▸ Advanced SEMIP algorithm for automatic measurements and interpretation
- ▸ Built-in high resolution thermal printer

MEDICAL EQUIPMENTS

MEDICAL EQUIPMENTS

EDAN®
Patient Monitor

Patient Monitor is a lightweight and portable patient monitor, a great choice for patient transport, with optional IBP and capnography support expands its applications to a wider usage in sub-acute divisions.

FEATURES AND BENEFITS:

- Optimized portable design for easy transportation
- Pacemaker detection, electrosurgical interference proof
- Defibrillation protection and defibrillation synchronization
- Unique iSEAP algorithm, optimized for arhytmia patients
- Dual-mode anti-interference pulse oximeter
- Support barcode scanner
- Complete and flexible mounting solutions
- Nurse call function
- Standard Parameter: 3/5-lead ECG, HR, RESP, EDAN SpO2, NIBP, PR, 2-TEMP

4-EP-EPMM50	Patient Monitor	Unit	1	1	MDRE

TMS®
Ultrasonic Fetal Doppler

TMS Ultrasonic Fetal Doppler is a high-performance fetal heartbeat detector, designed to meet the routine examination requirements of obstetricians.

FEATURES AND BENEFITS:

- Portable, lightweight and easy-to-use
- Full color OLED display FHR value, FHR intensity, improper FHR alarm signal, speaker volume, battery capacity indicator, working mode, frequency of the probe and FHR synchronization symbol
- Provides accurate FHR detection, it has FHR mode, Curve Mode, Replay Mode, Manual Count Mode, Average FHR Mode and Countdown FHR Mode
- With power saving that turns on automatically without signal within 30 seconds
- User-friendly machine interface for easy menu selection
- Standard 9V alkaline battery, available for power supply, which can support 300 minutes of continuous work

REF CODE	DESCRIPTION / SIZE	UOM	QTY/BOX	QTY/CTN	MDR
9-IC-TMS100	TMS Ultrasonic Fetal Droppler	Unit	1	20	—

EDAN®
Fetal Doppler

Fetal Doppler is a user-friendly digital heart monitoring device that includes auto and manual modes to select based on user's preference. The auto mode uses real-time FHR and average FHR measurement configurations for fetal heartbeat monitoring. With the manual mode, a view of the fetal heart rate updates in 5 or 10-second intervals for a calculated measurement.

FEATURES AND BENEFITS:

- Ergonomic design, compact and lightweight
- Supports 2MHz, 3MHz, 4MHz, 8MHz waterproof probes
- For automatic and manual FHR Counting
- Large backlight LCD display
- Ideal for long time and continuous use (8 hours)
- Accurate FHR detection with clear sound
- Automatic power-off
- Easy-to-use

EDAN®
Fetal & Maternal Monitor

Fetal & Maternal Monitor is an innovative fetal and maternal monitor that features integrated monitoring of twin's FHR, uterine activity, fetal movement, intrauterine pressure, direct ECG as well as maternal NIBP, SPO2, ECG and temperature. Designed for the obstetrical care continuum, spanning from the antepartum and intrapartum state to postpartum state.

FEATURES AND BENEFITS:

- 12.1" high resolution, colored TFT-LCD screen
- 12 crystal beam waterproof FHR transducer 12-crystal broad beam
- 24 hours back up memory for seamless monitoring
- Three monitoring interfaces for different clinical needs
- Signal overlap verification to seperate twins' FHR
- Flat surface design with waterproof TOCO transducer

Portable Defibrillator

TMS Portable Defibrillator is a compact, portable and lightweight defibrillator, designed with built-in module to ensure stable and reliable performance.

FEATURES AND BENEFITS:

- Multiple measuring functions which include: 3-lead, 7-lead, ECG/HR
- Complete built-in module design ensures stable and reliable performance
- Built-in recorder supports real-time recording, present screen printout and trigger print out by alarm
- Parameter display with big character
- 7-color high brightness TFT LCD monitor
- Portable design, stylish and convenient
- Rechargeable maintenance-free battery
- Resistant to high-frequency electrotome and is protected against defibrillation effects.

Portable Suction Machine

Thomas Portable Suction Machine is portable suctioning device that features high-performance, designed for applications requiring high vacuum capacity.

FEATURES AND BENEFITS:

- Oil-free diaphragm
- Capacity of plastic bottle cc/type: 1200cc/Autoclavable
- Hydrophobic filter to protect the pump
- Dimension: 37.5cm x 21cm x 25.5cm
- Max. vacuum: 560mmHg @ sea level
- Weight: 4.9 kg

REF CODE	DESCRIPTION / SIZE	UOM	QTY/BOX	QTY/CTN	MDR
0-TI-TP1637	Thomas Portable Suction Machine	Unit	1	1	MDRE

Portable Suction Unit

TMS Portable Suction Unit is a new generation oil-free suction device, specially designed to provide efficient vacuum operations.

FEATURES AND BENEFITS:

- Newly designed oil free lubrication pump
- Extremely portable for easy transport in the hospital, can also be used in home care settings
- With 1 piece 800cc collection bottle and 1 piece bacterial filter
- Sound level: 65dB
- Vacuum rate: 18LPM

Infusion Pump

TMS Infusion Pump is a reliable medical device that delivers fluids and medications into the patient's body in controlled amounts. Easy to operate by just turning the rotary dial to select desired settings. Compact and lightweight for easy handling and mounting.

FEATURES AND BENEFITS:

‣ Compatible with IV sets of any standard
‣ Real-time infused volume
‣ Automatic power switching
‣ Curvilinear peristaltic pumping mechanism
‣ With history log of 20,000 events
‣ With battery life of 5 hours at 25mL/hr
‣ With built-in thermostat (from 30-45℃)

TMS®

Infusion Pump

TMS Infusion Pump is an advanced infusion device, designed to guarantee accuracy of dose rate, engineered with; drug library, history record review and last configuration memory.

FEATURES AND BENEFITS:

‣ Universal: Compatible with any brand of IV sets
‣ Accuracy: High-precision performance
‣ Easy to use with intuitive operation system
‣ Safety: Alarm volume adjustable in 9 levels and bubble detection with 3 sensitivities
‣ Smart touch button, TFT oversize touchscreen
‣ With built-in thermostat (from 30-45 degree Celsius)

INMED

Medical Oxygen Regulator

Inmed Medical Oxygen Regulator OXR-580 is a piston type flow meter regulator with easily accessible flow adjustment knob, designed to regulate the free flow of medical oxygen from an oxygen cylinder.

FEATURES AND BENEFITS:

‣ Piston type, high-pressure chamber with chromed forged brass body
‣ Polycarbonate inner and outer tubes
‣ Flow range: 0-15 LPM
‣ Working Pressure: 50PSI
‣ Back pressure compensated flow meter
‣ 3000 psi maximum inlet pressure
‣ Accessories: humidifier bottle, cannula and wrench
‣ Inlet Connection (connecting thread): CGA540
‣ Tested to CGA (Compressed Gas Association) standards

TMS®

Oxygen Concentrator with Nebulization Function

The TMSOxygen Concentrator with Nebulization Function collects high purity oxygen from ambient air and is designed to provide assurance of oxygen supply.

FEATURES AND BENEFITS:

- ‣ Provides direct to patient high oxygen concentration.
- ‣ With fluctuation control feature, an innovative feature that allows oxygen output purity fluctuation rate controlled within 0.1%
- ‣ 6" LED screen display with E-touch operating panel
- ‣ Max oxygen flow: 5LPM, Oxygen Purity: 93%±3%
- ‣ Allows usage of up to 24 hours a day, 7 days a week
- ‣ Lightweight, movable with castors for convenience. Actual weight: 19kg
- ‣ 6 Safety Alarm System: low oxygen, oxygen pressure protection, pressure faulty, power off, compressor faulty, overheat protection

AngelBiss

Oxygen Concentrator (10L)

Angelbiss 10L Oxygen Concentrator is a high-volume oxygen concentrator that provides sufficient oxygen flow and efficient oxygen purity, designed for patients who require for more than 5LPM of oxygen flow rate. This unit features nebulization option and 6 alarm functions.

FEATURES AND BENEFITS:

- ‣ Touchscreen multi-function 6'' LED light display
- ‣ With fluctuation control function that allows oxygen output purity fluctuation rate controlled within 0.1%
- ‣ High oxygen flow with oxygen concentration at 95%, all purity tested over 95%
- ‣ Single and dual flow options, two bottle system for a total of 10LPM
- ‣ Dual flow oxygen outlet accommodates two users at the same time
- ‣ Oxygen purity display by numbers with 96% accuracy
- ‣ 6 safety alarm function: Low Oxygen Alarm, Oxygen Pressure Protection Alarm, Pressure Faulty Alarm, Compressor Faulty Alarm, Overheat Protection and Power Off Alarm
- ‣ With nebulization function
